

BC Hosting DOCUMENTATION

To use the Portal: -

1. Open Google Chrome.
2. Download Metamask extension.
3. Create an account on Metamask and switch to Rinkeby Test Network.
4. Add Ethereum on your account from <https://faucet.rinkeby.io>
5. Click on Create Now to create your domain. Creating domain may take up to 20-30 seconds.
6. After domain is successfully created, add files on it by uploading your static web project in zip format.
7. Make sure that the zip folder contains an index.html file. Also, the zip should be such that on extracting it, a folder appears, which will contain your whole project. The zip should **not** be such that on extracting it, all the files come directly at the point of extraction.
8. Give Metamask confirmation for each of the files uploaded. Each may take up to 10-15 seconds.
9. Go to <http://missionimpossible-hackabit.tech/yourDomainName> to access your website and share it freely.
